

Genetics and Cloning

Do you more closely resemble your mother or your father?

What are some of your family characteristics?

Do you have any 'throwback' traits from former generations?

Do you believe that genetic engineering is ethical?

Is it ethical for pregnancies to be terminated on the basis of screening for congenital disorders?

Is it OK to choose the gender of your child before conception? What about other characteristics?

Is it OK to clone animals? How about humans?

Do you think scientists will be able to clone body parts in the future? Is this a good thing?

How would you react to a clone of yourself?

Are you happy to eat genetically modified food?

Do you agree that genetically modified crops are a good solution to food supply security?

Do you believe the humanity is getting weaker as the result of improved medicines and technology reducing natural selection? Could we survive without electricity and modern medicine?
