

How Many...?

How many times have you travelled abroad?

How many years has it been since you went to school?

How many houses have you lived in?

How many cell phones do you own?

How many hours of TV do you watch every day?

How many hours do you sleep each night?

How many times do you do your teeth each day?

How many people are there in your family?

How many siblings do you have?

How many close friends do you have?

How many computers do you own?

How many times do you go shopping each month?
