

Robots and Artificial Intelligence

Are you concerned or excited by the development of artificial intelligence (AI) and robots?

Do you believe most jobs in the future will be automated? Are there any that can't be automated?

Do you think a future world in which AI and robots take over all jobs is utopian or dystopian?

Can you imagine a doomsday scenario like in the movie Terminator being possible?

If automation takes over large numbers of jobs will a universal basic wage be necessary in your view?

Do you believe robots have the potential to become lifelike and indistinguishable from humans?

Will it ever be possible to have a relationship with a robot?

Do you think that in the future people will be able to use technology to 'upgrade' their bodies and brainpower?

In your opinion how long will it be before self-driving cars are common on the roads?

Do you think you would feel comfortable in a self-driving car?

Have you used any app or software which utilizes AI?
